

10ft Kahuna Flag Kit Template

← **Print Area**

Take all flag art to the edge of this area.

← **Live Area**

Keep crucial graphics and text within this area.

- ✓ Convert all text to outlines
- ✓ Convert spot colors to cmyk
- ✓ Any embedded bitmap images should have a resolution of 85–100 pixels per inch (ppi/dpi) at the size they are placed into this document.

How to use this template:

The “Instructions” layer can be discarded, after being read and understood.

Create your flag graphics on the “Art” layer, extending all background art and colors to the edge of the artboard (the Print Area).

Keep important graphics within the dashed line (the Live Area) to ensure that they will not be sewn through when the flag is hemmed.

The guide line shows the finished flag size after hems are sewn.
