

# 9.5ft Flag Kit Template

The diagram shows a vertical rectangular template for a 9.5ft flag kit. The top-left corner is rounded. A solid line represents the outer edge of the flag, and a dashed line represents the inner edge. Two arrows point from the text labels to these lines: one to the solid line and one to the dashed line.

## Print Area

Take all flag art to the edge of this area.

## Live Area

Keep crucial graphics and text within this area.

- ✓ Convert all text to outlines
- ✓ Convert spot colors to cmyk
- ✓ Any embedded bitmap images should have a resolution of 85–100 pixels per inch (ppi/dpi) at the size they are placed into this document.

### How to use this template:

The “Instructions” layer can be discarded, after being read and understood.

Create your flag graphics on the “Art” layer, extending all background art and colors to the edge of the artboard (the Print Area).

Keep important graphics within the dashed line (the Live Area) to ensure that they will not be stitched through when the sleeves and hems are sewn.
